Come on FCC. Dont be dumb and listen to the big guys. Let the little guy win once in a while. As a truck driver I transport freight all across the country and it was and has been always hard for me to find stations that I can listen to. When I found out about XM I was so happy as I could leave it on one station and not have to flip channels which is dangerous when driving a big truck. I was always safety concious but it is great having XM> I can now listen to weather so I know what is ahead of me, I can listen to traffic so I dont contribute to the clogs that are happening in one city which thereby reduces air pollution from my big diesel truck. I think the EPA would love you for that as well as every environmental agency in the country. XM is the best and I am imploring you to not fall under the special interests but for once do the right thing and keep XM doing its service. Thank you and I hope you do listen to my vote
Kevin David Koehn
